

*Our mission : is to offer best of class medical services and equipment needed for the enhancement and rehabilitation of the Iraqi healthcare sector, a goal we aspire to achieve by combining international standards of excellence, with premium quality offerings, and competitive pricing.*

*Our Vision :*

*To adopt a patient centric approach for best of class product and service delivery.*

Since our establishment, we, at Antemina Medical, have always been fully committed to providing our client base with world class products and services. We pride ourselves with the high ethical standards we adopt in our operations. Our thorough knowledge of operational trends and demands of the markets we operate within always keep us a few steps ahead from competition. These attributes have enabled us to constantly develop our product offering and service range. They have kept us better equipped to satisfy the ever changing demands of healthcare market.

We adopt a collaborative approach to our work, working with leading global healthcare suppliers and service providers. This in turn has enabled us to secure best service delivery across all clinical specialties.

# Our Operational Approach –An Overview

We are a forthcoming organization that provides vital assistance needed for the rehabilitation of healthcare facilities in Iraq. We offer our services in the following stages:

## Surveying Stage

We survey potential project sites, upon demand. Our survey covers both the status of the site's current infrastructures and medical equipment it currently operates with. According to our findings, we recommend options. These options can include:

- Upgrading
- Migrating and upgrading current systems to Digital Technologies
- Render current systems obsolete, total replacement of current systems Required

## Solution Implementation Stage

We go that extra mile beyond the solution finding stage, as we also propose a well laid out comprehensive implementation schedule for the plan we had recommended. Upon client approval, we carry out the plan we had made with a strict commitment to presenting end product on time.

## Monitoring Stage

We continue to monitor the project post delivery, so as to :

- Assess Implementation Gaps
- Implement Corrective Actions When Needed
- Propose Continuing Improvement Plans

# Where we Operate

At present, we operate in the Iraqi market, catering to the demands of both the private and public sector.

## Our Strength

- We engage with clients from the planning stage to final performance evaluation stage.
- We have a team well versed in all product related competencies
- We have good knowledge of the markets we operate within
- We form partnerships with leading healthcare product and service providers
- We search for the most cost effective, efficient, and guaranteed successful solutions for our client base.

## Our Team

We understand that our team is the building block of our success. We therefore, constantly work to upgrade our team members' clinical, educational, technical, and personal abilities. By doing so, we ensure that all our team members are well armed with the abilities and knowledge they need to cope with the ever changing demands of a dynamic market. We guarantee that our team is on par with their peers working across the globe. At present our team comprises experienced and seasoned specialists, with vast knowledge and skill in a variety of medical fields including:

- Radiology

- Cardiology

- Surgery

- Medical Information Technology

- Emergency (ER) Medicine

- Oncology

- ICU Facilities

- Neurology Supplies

- Physiotherapy Supplies

Our Team operates under the guidance of medical staff and healthcare professionals who have reached a senior level within their careers. Through their supervision, they capitalize on their skills, vision, and knowledge. Doing so enables them to ensure that the solutions provided to clients are efficient, cost effective, and productive.

#### Hospital Rehabilitation

In collaboration with partners operating across global private sectors, we provide a full Hospital Rehabilitation solution in accordance with the following steps. We survey the site in terms of infrastructure, equipment status, the technological network available, and organizational structure. We also perform a workflow audit, and then we present our findings to the client. Our findings may either include recommendations of upgrading, migration to digital technologies, or rendering the existing technology and methodologies used obsolete. The solution will also include a plan of action which is implemented upon client approval and in accordance with a schedule. After implementation, we monitor the progress, correcting any problem areas if necessary.

#### Hospital Construction

We, Antemina Medical, take on Hospital Construction projects, whereby we build hospitals, furnish them, equip them, recommend technologically advanced, efficient, and cost effective healthcare structures for their management.

We implement this project in collaboration with our partner and sister company Iraqi Arab Contractors, (Arab Contractors branch in Iraq).

We work together with our partners to create a team that will handle your project from the planning to staff training stage. Our core competencies include:

- Hospital Planning.
- Design for Easy Workflow in Compliance with Latest Healthcare Standards.
- Capital Equipment Providing.
- General Facility Equipment Providing.
- Medical Gases.
- Power Supplying.
- Equipping ICU.
- Equipping Operating Rooms.
- Water and Sewage Treatment Plants.
